Lumosa Touch is an interactive web application, meant to operate the LED lighting from Campo Sportivo. LT provide a simple, fast and user-friendly way to control the lights through a standard PC, tablet or smartphone. Due to the unique interface, LT can be operated through both the standard mouse or your own finger..

Suitable for slowmotion

Thanks to the use of advanced drivers, our LED lighting for stadiums is flicker-free and therefore suitable for television and super slow-mo.

Lightshows

Our stadium LED lights operate at high speed. Combine their speed with music and you have a spectacular light show!

Optimal range

Due to the special optics, our LED lighting can shine far and focused from a great height. This way we ensure the field to be illuminated evenly.

Suitable for slowmotion

Thanks to the use of advanced drivers, our LED lighting for stadiums is flicker-free and therefore suitable for television and super slow-mo.

Lightshows

Our stadium LED lights operate at high speed. Combine their speed with music and you have a spectacular light show!

Optimal range

Due to the special optics, our LED lighting can shine far and focused from a great height. This way we ensure the field to be illuminated evenly.

We developed our own driver with a power output up to 1800watts

The modules on all lumosa luminaires can be moved separately, both on the x and on the y axis

The whole armature can move on the x and y axis.

Our luminaires are designed to get rid of the heat that the LEDs give off as well as possible.

We have developed different type of lenses suitable for different situations ranging from 8° (studio) up to 60° (wide)

We use high power LEDs, ranging from 3000K up to 5700K. This way we have an solution for everyone

LED lighting for stadiums involves a lot in terms of high requirements for quality and light output. This makes it a profession in its own right. Clubs want to give their supporters a unique and sensational experience from the moment they first enter the stadium. A high light output is essential not only for the supporters to see everything clearly, but also for players to perform optimally.

Stadium lighting does not just mean a lot of light output. It also means uniformity, extremely high quality and entertainment. By combining lighting with entertainment, a unique experience is created.

CampoSportivo Stadio

The Campo Sportivo Stadio has been specially designed to provide bright lighting for stadiums. These luminaires not only drape a stadium in bright, white light. It also has unique drivers. These drivers ensure the Campo Sportivo stadio to be flicker-free, enabling both slow-mo and ultra-slow-mo. This makes this all-in-one solution for stadiums ready for television.

	Amount		Power		Lumen		
	modules	#	Total	#	Total	lm/watt	Weight
CS860 Stadio	8	200	1600	20000	160000	100	25kg

lumosa

Outdoor LED-lighting

The latest LED technology combined with optimal optical and thermal design. That is our top luminaire Campo Sportivo. All aspects of this luminaire result in an efficient solution for lighting all outdoor sports fields. Thanks to the optical design and our light hoods, all light coming from the luminaires hit the field to the utmost while minimalizing light scattering so local residents are not affected.

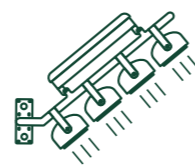

Sustainable and efficient

Lumosa gets the most out of every kilowatt hour. The right choice of materials and optimized design ensure that our luminaires have a long service life. Not only good for the environment, but also for your wallet. Save up to 65% energy costs!

Personalisation

A smart lighting solution for everyone. We optimize our product according to your wishes with a range of light products, detailed lighting plans and user-friendly software.

Innovative

The combination of smart design and high-end lens and LED technology, we ensure beautifully uniform light with daylight spectrum, reduced shadow formation and minimal light pollution.

Outdoor Sports Lighting

Campo Sportivo 860 Pro

The CS860 PRO is our most powerful armature yet. It is specially designed for sports played on big fields like Football or Hockey. But it is also very useful for tennis courts when high amounts of lights are required.

	Amount	Power	Lumen				
	modules	#	Total	#	Total	lm/watt	Weight
CS860 Pro	8	215	1720	27000	216000	126	25kg

Campo Sportivo 840 Pro

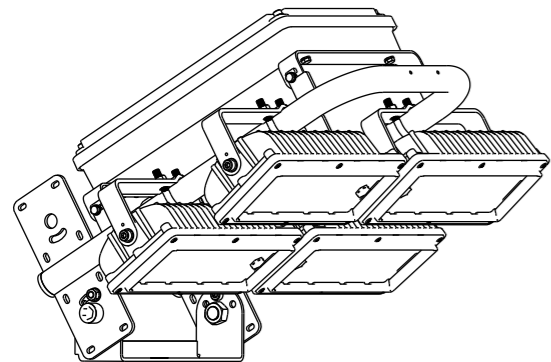

The CS840 PRO is designed for smaller sport fields like tennis. The armature produces an even spread light image. But is not as powerful as the CS860 PRO ideal for fields that do not require the maximum amount of light.

	Amount	Power	Lumen				
	modules	#	Total	#	Total	lm/watt	Weight
CS840 Pro	8	150	1200	18500	148000	123	25kg

Campo Sportivo 460 Pro

The CS460 PRO is the little brother of the CS860 PRO. Because it has only 4 modules it consumes less energy perfect for small pitches or tennis courts that do not need much lumes.

Tube

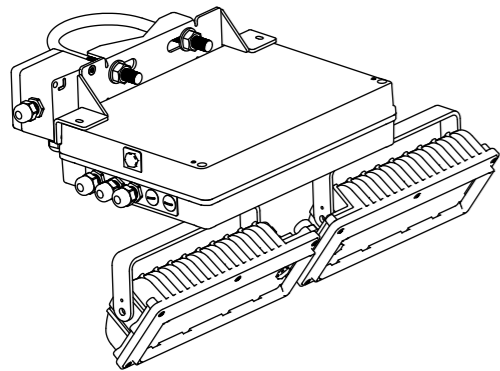

U-bolt

	Amount		Power		Lumen		
	modules	#	Total	#	Total	lm/watt	Weight
CS460 Pro	4	215	860	27000	108000	126	25kg

Campo Sportivo 260 Pro

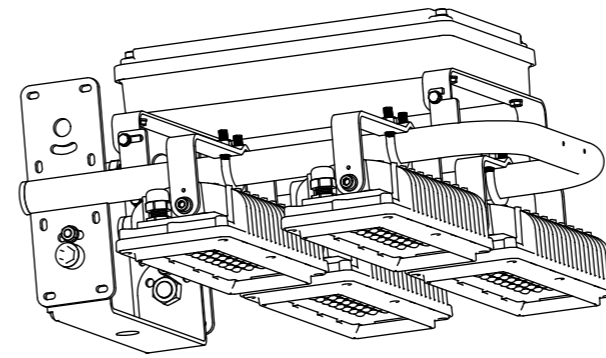

The CS260 is the even smaller brother of our CS860. It is ideal for little training courts or small fields where other armatures are too powerfull.

	Amount		Power		Lumen		
	modules	#	Total	#	Total	lm/watt	Weight
CS260 Pro	2	210	4300	27000	54000	126	-

Campo Sportivo 430 Pro

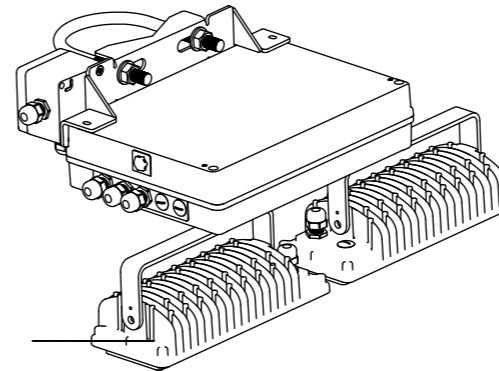

The CS430 is designed to be the perfect armature for national and international padel matches. Because padel courts often have relatively small poles they need special lenses that reduce blinding from the led's

	Amount		Power		Lumen		
	modules	#	Total	#	Total	lm/watt	Weight
CS430 Pro	4	215	860	27000	108000	126	-

Campo Sportivo 230 Pro

The CS230 is designed to be the perfect armature for recreative and amateur padel courts. Because padel courts often have relatively small poles they need special lenses that reduce blinding from the led's.

	Amount		Power		Lumen		
	modules	#	Total	#	Total	lm/watt	Weight
CS230 Pro	2	215	430	27000	54000	126	-

Indoor sports LED lighting ensures that fields are illuminated as if you're standing in broad daylight. Because our LED lighting fits every infrastructure and our luminaires are custom-made, installation becomes easy. Also, thanks to our specially developed lenses for indoor sports lighting, glare is minimized.

Save on energy

With Lumosa indoor LED lighting in combination with our management system you can save up to 70% on your energy bill. Because of the thermal design more energy goes in to lighting and less to heat generation.

With our LED lighting you can easily switch between full field, half field or even a quarter field. This way you never have the lights on when they are not in use.

Evenly lighting

Because we make a light plan for each project you are ensured of an evenly spread light across the whole field.

Palazzo Sportivo 860

Palazzo Sportivo 860 Pro

The PS860 PRO is based on our CS860 PRO but only it is fixed to an hanging structure which makes it ideal for an indoor armature. Because of the high power led modules every indoor space will be even and brightly illuminated.

	Amount	Power	Lumen				
	modules	#	Total	#	Total	lm/watt	Weight
PS860 Pro	8	200	1600	20000	160000	100	25kg

PS230 Pro	2	125	250	15500	31000	124	-

Our Linea LED fixtures are so bright, you might as well be standing in broad daylight. Making movements and players much better to notice. This creates an enjoyable experience for both the audience and players.

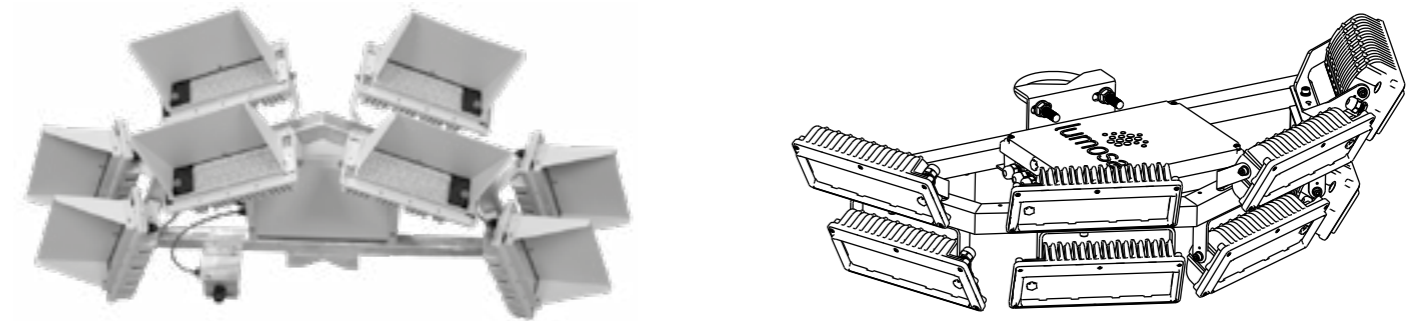

Outdoor Industrial Lighting

By using LED lighting, up to 75% can be saved on the energy bill while ensuring a safer working environment. A well-lit working environment ensures that accidents are prevented as much as possible so employees can work safely. Our LED lighting for industry is uniform and bright white. This reduces eye strain and makes a positive contribution to both work efficiency and absenteeism.

Corona 8

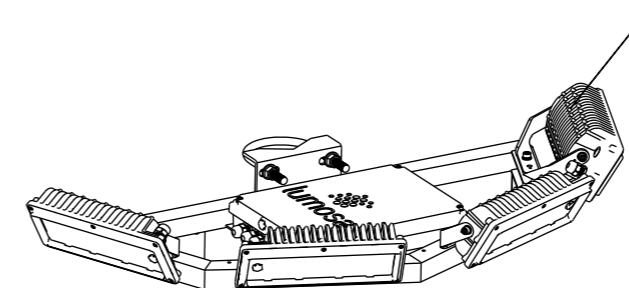

With our Corona luminaires, we offer a high-quality LED solution for container terminals, parking lots, traffic squares, train stations, industrial sites and more. Every area has specific lighting requirements. With our Corona LED lighting, any area, regardless of size, can be evenly lit.

	Amount	Power	Lumen				
	modules	#	Total	#	Total	lm/watt	Weight
Corona 8	8	125	1000	15500	124000	124	25kg

Corona 4

The Corona 4 is the fixed on the same frame as the Corona 8. The Corona 4 has only the 4 top modules. And is perfect for smaller areas of areas that require less light.

	Amount	Power	Lumen				
	modules	#	Total	#	Total	lm/watt	Weight
Corona 4	4	125	500	15500	62000	124	-

Linea

Linea's luminaires are made for smaller industrial halls, warehouses and workshops. Thanks to both the symmetrical and asymmetrical lenses, the working environments is evenly illuminated.

By aligning the public LED lighting precisely, unnecessary stray light is minimized while living comfort is increased. Living comfort is one of the main reasons for choosing decent public lighting, after all. Our luminaires are easily adjustable in regard to switching them on and off and dimming the lighting. This contributes so much the more to increasing living comfort!

Linea's luminaires are made for smaller industrial halls, warehouses and workshops. Thanks to both the symmetrical and asymmetrical lenses, the working environments is evenly illuminated.
